

Systems Development Consultant

- ✚ Newly Created Position
- ✚ Boutique Contact Centre Bureau
- ✚ North Shore Location

Our client is a boutique customer interaction provider to many of the country's best known financial services organisations. They have a proud history of successfully providing innovative, cost effective marketing solutions tailored to individual client and customer needs for more than 10+ years in the outsourced customer contact arena.

Recognising the need to engage best practice, a rare opportunity to join this employer of choice now presents itself to market. This role will be responsible for analysing the business needs and then developing & implementing information system solutions as required by third party and internal clients.

You will consult with clients on their business and functional requirements, redefine outcomes and implement to the agreed plan and solution. You will consult regularly with internal/external user groups to deliver time & cost estimates, including unit and/or systems tests, debugs and corrections in a detailed oriented manner.

We therefore seek expressions of interest from candidates who profile as follows:-

- ✚ Proven knowledge in the principles/techniques of system analysis, design, development & programming;
- ✚ Proven knowledge of information systems, programming languages and operating systems;
- ✚ Solid grounding in business theory and functional planning;
- ✚ Proficient with Microsoft Windows 2000 or higher;
- ✚ Minimum 3 years VB, VBA and ASP.net/VB.net, WinForm experience;
- ✚ Minimum 3 years JavaScript/Ajax experience;
- ✚ Minimum 3 years Web Services/XML/SOAP;
- ✚ Minimum 3 years SQL Server experience; and
- ✚ Relevant tertiary qualifications preferred but not essential.

For further information, in strict confidence, please email your detailed resume with a covering letter to **dokeefe@tanna.com.au** quoting **Ref. No DOK/50196**. Alternatively, contact **David O'Keefe** on 02 9947 9775.
